## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Downey et al. (US 6206832). Downey et al. disclose an ablation device spacer for use with a patient undergoing a targeted ablation procedure utilizing ablation devices insertable into treatments zones of the patient comprising and elongated spacing member (15) and at least one ablation device engaging element (50) positioned on the elongated spacing member, wherein during use an ablation device is releasably engageable with the ablation device engaging element and a spacing portion of the elongated spacing member being spaced from the ablation device engaging element (figure 3) at a desired distance so as to provide the user with an indication of desired spacing for a subsequent ablation device to be inserted into its respective treatment zone.
